

Martin Hermann Becomes **New CFO** at **crop.zone**

Financial Expert joins the executive team at crop.zone - the specialist for herbicide-free weed control

Aachen, Germany, December 7th, 2022 – Dirk Vandenhirtz, CEO of crop.zone GmbH, welcomes Martin Hermann into his executive team as the new CFO: “I am very happy that we could convince Martin to join the crop.zone team and share our vision!” The new head of finance at crop.zone has worked with several companies during periods of accelerated growth. He is the co-founder of Tempus Capital, an investor in and partner of European mid-market companies. Since the beginning of December, Hermann has strengthened the management team at crop.zone.

In 1995 Martin Herrmann started his professional career at PriceWaterhouseCoopers (PwC) where he worked as an auditor and business consultant. He also worked in various positions for financial advisory firms and investment banks, including FTI Consulting, Alvarez & Marsal, UBS.

Warburg and Goldman Sachs. In March of 2008, he co-founded Tempus Capital, which provides a combination of capital and active operational management to European mid-sized companies.

Martin Hermann holds a bachelor's degree in Business Administration from the University of California at Berkeley and a Master of Business Administration degree from Stanford University Graduate School of Business, graduating as an Arjay Miller Scholar in 2002.

“ I am very excited about joining Dirk's team and making a contribution to the next chapters of crop.zone's success story in sustainable agriculture.”

About crop.zone

Works like a herbicide. But without residues.

crop.zone has become the specialist for herbicide-free desiccation with cross-field knowledge from chemistry, biology, physics, ecology, and agronomy. The professional technology incorporated in our machines enables safe, efficient, and cost-effective crop preparation. Our technologically advanced system achieves premium quality yields while protecting the soil. crop.zone offers the solution for ecological and sustainable agriculture and thus makes its contribution to the future of our planet.
